

Custom FF&E for Hotels

HIGNEY INTERNATIONAL

Designed by operators. Manufactured to endure.

WHY WE'RE DIFFERENT

We've operated the hotels we now furnish.

Before Higney International manufactured its first piece of furniture, our team spent 25 years operating luxury hotels and beach clubs — from the Ritz-Carlton to Nikki Beach properties across four continents. We've managed the pool decks, the lobbies, the F&B outlets, and the rooms.

That means every piece we design carries operational intelligence that most FF&E suppliers simply don't have. We know what housekeeping does to a chair at 6 AM. We know which fabrics survive sunscreen and chlorine. We know that your pool loungers need to be light enough for one attendant to reset 40 of them before the morning rush.

Our custom manufacturing division works directly with master craftsmen in Vietnam and Indonesia, delivering hotel-grade furniture at 40% below comparable domestic pricing — without compromising on quality, durability, or design.

Built for the Demands of Hospitality

Asset Lifecycle Thinking

Hotel furniture isn't a purchase — it's an asset with a replacement cycle. We design for 7-10 year lifecycles in high-traffic areas, with commercial-grade joinery and marine-grade finishes that hold up to daily housekeeping and guest use.

Brand Consistency Across Properties

Expanding to a second or third location? We maintain exact specifications — same factory, same craftsmen, same finishes. Your brand identity stays consistent whether you're in Miami or Marbella.

Operator-Informed Design

Stackable pool loungers for overnight storage. Dining chairs light enough for banquet resets. Fabrics rated for UV, chlorine, and sunscreen. We design for your operations team, not just your guests.

Seamless Reorder & Replacement

Once we build your pieces, replacements are exact and fast. Same specs, same factory. No redesign, no re-quoting — just reorder. Reduce your FF&E procurement overhead permanently.

What We Manufacture

Pool Deck & Outdoor

Loungers, daybeds, cabana furnishings, side tables, and umbrellas. UV-resistant, weatherproof, and built to survive coastal environments season after season.

Lobby & Public Areas

Lounge seating, accent tables, reception desks, and custom millwork. Statement pieces that define your arrival experience and reinforce your brand from the moment guests walk in.

Spa & Wellness

Treatment room furniture, relaxation loungers, changing area seating, and wet-area rated pieces. Materials selected for humidity, moisture, and constant cleaning protocols.

Restaurant & F&B

Dining chairs, barstools, banquettes, communal tables, bar facades, and host stands. Designed for high-turnover service environments with commercial-grade durability.

Guest Room Accents

Luggage racks, desk chairs, side tables, headboard frames, and in-room accent furniture. Pieces that elevate the room without inflating your per-key FF&E budget.

Concept to Container

Full project management from design sketches through manufacturing, QC, export documentation, ocean freight, and delivery to your loading dock. One point of contact, end to end.
