

Custom Furniture for Restaurants

HIGNEY INTERNATIONAL

Built by the people who've run them.

WHY WE'RE DIFFERENT

Your furniture vendor should know what a Friday night rush does to a chair.

Most furniture companies design for showrooms. We design for service. Before we ever manufactured a single piece, we spent 25 years operating restaurants, beach clubs, and luxury hotels — managing everything from the dinner rush to the morning reset.

We know that a beautiful barstool means nothing if a server can't move it one-handed. That a dining chair needs to survive three turns a night, seven days a week, without showing wear. That your back-of-house team will stack them whether they're designed for it or not.

Our custom manufacturing division works directly with master craftsmen in Vietnam and Indonesia to build furniture that looks like it belongs in a design magazine — and performs like it was built for a restaurant. Because it was.

DOMESTIC

Built for Restaurants

Durability by Design

Commercial-grade joinery, marine-grade finishes, and reinforced frames. Every piece is rated for high-traffic hospitality — not residential "contract grade" that falls apart in 18 months.

Your Brand, Your Look

Fully custom shapes, dimensions, wood species, stains, and upholstery. Match your interior vision exactly — no compromising with catalog pieces that are "close enough."

Operator-Informed Details

Stackable designs for easy storage. Kick plates where servers' shoes hit. Fabric that survives red wine. Weight that staff can actually move. We think about what designers don't.

40% Below Domestic Pricing

Direct relationships with factories in Vietnam and Indonesia — no middlemen, no distributor markup. Quality that competes with top-tier domestic brands at a fraction of the cost.

What We Make

Dining Chairs & Barstools

Hardwood frames with custom upholstery. Indoor and outdoor rated. Designed for three turns a night — stackable options available for banquet and event configurations.

Banquettes & Booths

Built-in seating with commercial-grade foam, drainage channels for outdoor use, and stain-resistant fabrics. Modular sections for flexible layouts.

Outdoor & Patio Furniture

UV-resistant, weatherproof seating and dining for terraces, rooftops, and sidewalk cafés. Built for sun, rain, and salt air without sacrificing design.

Tables & Bar Tops

Dining tables, high-tops, communal tables, and full bar surfaces. Solid wood, stone, or composite. Custom sizing to maximize your floor plan and covers.

Host Stands & Reception

First impressions matter. Custom millwork for host stands, reception desks, and entry features. Branded details that set the tone before guests sit down.

Replacement & Reorder Programs

Once we build your pieces, reorders are fast and exact. Same specs, same factory, same finish. Replace worn items without redesigning — just reorder.
